

GME HUB

One front door for Growth & Martech Engineering, which I proposed and designed at Adobe

Presented by : Suman Hemant

sumanhemant05@gmail.com

Why I Started This

- If you needed access to AEP, AJO or CJA, the request went through email, a Slack thread or a form someone had shared with you. It depended on who you asked.
- Getting started on AEP, AJO or CJA meant hunting for the right document and the right person. Most people didn't know where the first step was.
- Our own tools, like Data Catalog, Datastream 360 and Smart Analysis, lived in different places. You had to already know they existed to use them.
- Once you'd asked for something, you had no idea where it stood. The only way to find out was to message someone and wait.

What I Proposed

I suggested we give the team one front door. A single hub where you can ask for access, get onboarded, open any GME tool, and see where your requests are.

It was my idea, and I designed it end to end on my own: the structure of the hub, the request flow, the request tracker, the onboarding guides and the way the apps are laid out.

Three Things I Cared About Most

01 – Start from what people came to do

The home page is grouped by task: ask for something, get onboarded, use an app, or check monitoring.
Not by which team owns what.

02 – Always show where a request is

Every request gets an ID and a simple timeline: submitted, manager confirms, team review, ready. Nobody should have to chase anyone to find out.

03 – Onboarding as a short checklist

Each product has a step-by-step guide with a named person to ask, so the first week feels less like guesswork.

The Flow I Designed

- Home – pick what you came to do.
- Request – a three-step form instead of an email, with a draft saved as you go.
- Sent – a request ID and a clear picture of what happens next.
- My requests – every request you've raised, where it is, and the latest note from the team.
- Onboarding – a checklist for AEP, AJO or CJA, with your progress and who to ask.
- Apps – tools like Data Catalog, one click away once you have access.

AJO Quick Onboarding Guide

Integrate Journey Optimizer on your surfaces in five steps. Most teams finish in about a week. Stuck? Arjun Mehta from XLG is your contact.

Your steps

2 of 5 done

Get AJO access

Done through GME Request, GME-2026-0302.

Done

Pick your surface

You chose Web. Email and in-app can be added later.

Done

Connect your datastream

Link your sandbox to AJO using Datastream 360.

You're here

Launch

Create your first journey

Start from the GME welcome-journey template.

Up next

Launch

Test and go live

Run the go-live checklist with the AJO team.

Up next

Launch

Need a hand?

Most teams get stuck on the datastream step. Book 15 minutes with Arjun if it's your first time.

What I Wanted It to Change

- One place to ask for things, instead of emails and Slack threads.
- New people can start on AEP, AJO or CJA without having to know who to ask first.
- Our own tools are easy to find, not hidden in bookmarks.
- People can see where their request is without chasing anyone.

Color-theme

Color	Hex	Usage
● Hub Violet	 #9B5CF6	Header gradient start, brand
● Deep Violet	 #5B3A9A	Header gradient end
● Action Blue	 #1473E6	Buttons, links, current step
● Signal Red	 #EB1000	Product icons
● Done Green	 #2FA84F	Approved, completed steps
● Review Amber	 #F0A020	In review, delayed
● Soft Pink	 #F7B8E6	Welcome banner glow
● Ink	 #222222	Text and headings

If I Took It Further

- **Sit with a few people raising their first request and watch where they hesitate.**
- **Count how many requests still arrive by email, and work out why.**
- **Let the onboarding checklist tick itself off when access actually comes through.**
